ControlBridge Multisystem and Room Control Solution

CONTROL EVERY ASPECT OF YOUR ROOM

Achieve the highest level of automated room control with the ControlBridge® Multisystem and Room Control System. Use it to connect and control everything in small to large control rooms, conference rooms, and training centers. With a touch of a button or swipe of a touch panel, you can lower the screen, dim the lights, and control your KVM system. ControlBridge gives you simple, integrated control of all room elements so you can focus on your task - not the technology.

Benefits and Features

Integrated AV and Environmental Control
Lower the screen; dim the lights; turn on the sound; and share your presentation - all with the press of a button.

Local & Remote Automation and Control
Access and control AV, room automation, and other equipment via Ethernet, serial, IR, digital I/O, and relay connections.

Scalable
Control processors for small, mid-size, and large applications simplify operations for technologies already in use.
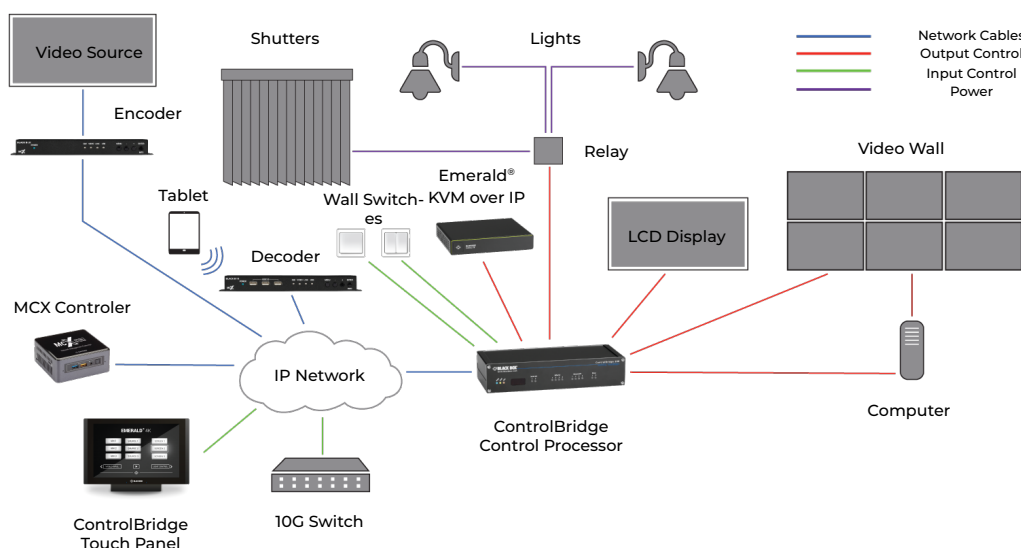

Unlimited Input Devices
Control applications with any number of touchscreens, push buttons, and mobile devices (iOS, Android®, Windows®).

Industrial Standard Protocols
ControlBridge supports building automation programs, such as DALI, KNX, enocean, and ModBus.
